

Fictional report: AOSpine Course Name

Course: AOS XYZ

Participation rate: Y%

Legend	Present level: Participants' self-reported present level of ability for each competency (1=low, 5=high)	Gap = Motivation to learn ('Desired level' minus 'Present level')
	Desired level: The level of ability participants would like to have for each competency (1=low, 5=high)	

Scores = Average % score of all participants for each multiple choice question
--

Interpretation of gap scores	< 1	Means low motivation to learn about the competency
	1 to 2.5	Means good motivation level
	> 2.5	May mean learners are anxious about their low level of ability

Motivation to learn (Gap = Desired level of ability minus present level)

	0	1	2	3	4	5
C03: Examine the patient	Present					2.5
	Desired					3
C07: Reduce/decompress/stabilize	Present					4
	Desired					4.5
C01: Resuscitate the patient	Present					4.1
	Desired					4.8
C02: Immobilize the spine	Present					2.6
	Desired					3.9
C09: Identify and manage complications	Present					3.1
	Desired					4.7
C06: Evidence-based decision making	Present					3
	Desired					4.7
C05: Classify the injury	Present					3
	Desired					4.7
C08: Collaborate in rehabilitation plan	Present					3
	Desired					4.8
C04: Order appropriate imaging	Present					3
	Desired					4.8
